Answers & facts

Funny Trivia · Round 1 · Animals behaving oddly · 10 questions

1 What is a group of flamingos called?

C. A flamboyance

Did you know? Flamingos get their pink colour from pigments in the algae and tiny shrimp they eat.

2 Which animal's droppings are shaped like cubes?

C. The wombat

Did you know? Wombats leave their cubes on rocks and logs, which may help them mark their patch.

3 Why can a sloth's fur look a little bit green?

A. Algae grows in it

Did you know? Sloths move so slowly that tiny algae can live in their fur, which helps them blend in with the trees.

4 What is a baby puffin called?

C. A puffling

Did you know? Puffins raise their chicks in burrows, often on clifftops.

5 Which animal can doze standing up, thanks to joints that lock its legs in place?

B. The horse

Did you know? Horses still need to lie down for their deepest sleep.

6 What is unusual about a male seahorse?

C. He carries the babies

Did you know? The female puts her eggs into a pouch on the male's belly, and he gives birth.

7 Which animal is nicknamed the "unicorn of the sea"?

A. The narwhal

Did you know? The narwhal's long "horn" is really a tooth.

8 Which animal can turn its head about 270 degrees?

C. The owl

Did you know? Owls can't move their eyes in their sockets, so they turn their whole head instead.

9 Which of these big animals can't jump?

A. The elephant

Did you know? Even at full speed, an elephant always keeps at least one foot on the ground.

10 How do dolphins sleep?

A. With half their brain at a time

Did you know? Resting one half of the brain at a time lets a dolphin keep coming up to breathe.
