Answers & facts

Afternoon Trivia · Round 1 · In the garden · 10 questions

1

In Britain and Europe, which small bird with a red breast often follows gardeners as they dig?

A. The robin

Did you know? The American robin is a different, larger bird. It's a type of thrush.

2

Young sunflowers are famous for doing what?

C. Turning to follow the Sun

Did you know? Once they're fully grown, most sunflower heads stop moving and face east.

3

Which herb is the main ingredient in pesto?

B. Basil

Did you know? Classic pesto comes from Genoa, in northern Italy.

4

What do gardeners call a plant that comes back year after year?

A. A perennial

Did you know? Annuals grow, flower and set seed all in one season.

5

Which tree grows acorns?

A. The oak

Did you know? In some years, called mast years, oaks produce far more acorns than usual.

6

Tulips are famously grown in which country's colourful fields?

B. The Netherlands

Did you know? Wild tulips first came from Central Asia, and were grown in the Ottoman Empire long before they reached the Netherlands.

7

What does a gardener mean by "deadheading"?

B. Removing faded flowers

Did you know? Deadheading encourages many plants to keep on flowering.

8

Which fruit is dried to make raisins?

B. Grapes

Did you know? It takes about four pounds of fresh grapes to make one pound of raisins.

9

In Japan, people celebrate which blossom each spring with outdoor picnics called hanami?

C. Cherry blossom

Did you know? Forecasters track the "cherry blossom front" as it moves north across the country.

10

Why are earthworms good for a garden?

B. They mix and enrich the soil

Did you know? Charles Darwin's last book, published in 1881, was all about earthworms.
